CATALYS, AN EXPERT IN FINE CHEMICALS, HAS BEEN WORKING FOR THE PHARMACEUTICAL, COSMETIC AND CHEMICAL INDUSTRIES SINCE 1996.

Catalys offers to support you in your projects dealing with the Fine Chemical industry. This also includes **research, development, company strategy, marketing and commercial activities.**

Our business model consists of a wide range of competencies based on our broad experience within the fine chemicals world, respecting your requirements and our values.

OUTSOURCING

SUPPLIERS:

Catalys identifies manufacturers of rare or specific products. This includes raw materials, intermediates or active ingredients. These projects are performed under Confidential Disclosure Agreements.

SUBCONTRACTORS:

We select the most appropriate partner and closely follow initial pilot production, until commercialization of the product. The choice of the partner is validated by the customer according to quality criteria, reliability and economical constraints.

COMMERCIAL REPRESENTATION

AGENT ON THE EUROPEAN MARKET:

Based on our expertise and knowledge of Fine Chemical, Pharmaceutical, Cosmetic industries and markets, we represent foreign companies in Europe.

CONSULTING

CONSULTING FOR INDUSTRIALIZATION:

Critical feasibility studies of research processes and scale-up elaboration according to reliable technologies that are compatible with existing raw materials.

TECHNOLOGICAL DEVELOPMENT:

Intellectual property analysis on existing molecules and published synthetic routes. Research and submission of alternative routes tested at the bench by laboratory partners.

INTERNAL GROWTH:

Assistance in the identification of new markets in Europe and Worldwide, using Catalys' International network established over many years.

EXTERNAL GROWTH:

Assistance in business strategy design and in acquisition or licensing opportunities, including negotiations with the identified targets.

INNOVATION

NEW MOLECULE RESEARCH PROGRAM:

Catalys maintains an important New Chemical Entity research program for applications mainly concerning pharmaceutical or cosmetic areas, leading to French and International patent registrations.
